

## NEWS RELEASE

### WINTERGARDEN GROUNDWATER CONSERVATION DISTRICT WATER WELL MONITORING REPORT

The Wintergarden Groundwater Conservation District (the District) maintains water level monitors in various private wells throughout the District (Dimmit, La Salle, and Zavala Counties.) The following information is to help you be aware of the water levels that have been recorded. The information listed is levels at the end of each calendar-year quarter starting on June 25, 2022, thru September 30, 2023. The District has recently added four (4) new wells to its monitoring program. Water level readings began on June 23, 2023, and are included in the chart below. Some location information is not provided due to request for privacy by the well owner. Please note that the water level is the depth of the water from the ground surface. For more information, please feel free to contact the District at 830-876-3801. If available, any recorded date prior to these dates can be obtained by calling the District. All well monitors maintained by the District are in the Carrizo Aquifer.

County	Well Name	Location	Latitude Deg <sup>o</sup> Min.' Sec."	Longitude Deg. <sup>o</sup> Min.' Sec."	Elevation	Calendar Quarter	Water Level (feet – ‘)
Dimmit	Dixondale	3 mi. W. of Brundage	28° 35' 51"	99° 42' 21"	549'	6/25/2022	495.693

The District is expanding its well monitoring program within Dimmit, La Salle and Zavala Counties. If you have a Carrizo Aquifer water well, preferably with access to electricity and Wi-Fi services, and if you are interested in allowing access by the District to the well location, please contact the District Office at 830-876-3801.
