

NEWS RELEASE
WINTERGARDEN GROUNDWATER CONSERVATION DISTRICT WATER WELL MONITORING REPORT

The Wintergarden Groundwater Conservation District (the District) maintains water level monitors in various private wells throughout the District (Dimmit, La Salle, and Zavala Counties.) The following information is to help you be aware of the water levels that have been recorded. Some location information is not provided due to request for privacy by the well owner. Please note that the water level is the depth of the water from the ground surface. For more information, please feel free to contact the District at 830-876-3801. If available, any recorded date prior to these dates can be obtained by calling the District. All well monitors maintained by the District are in the Carrizo Aquifer.

County	Well Name	Location	Latitude Deg ^o Min.' Sec."	Longitude Deg. ^o Min.' Sec."	Elevation	Calendar Quarter	Water Level (feet - ')
Dimmit	Dixondale	3 mi. W. of Brundage	28° 35' 51"	99° 42' 21"	549'	9/25/2023	475.344

Designated Index Wells are monitored for drought conditions within the District.

Drought stages, Drought Index Wells, and groundwater elevations (expressed as feet below ground level) for each county.

Drought Stage	County	Drought Index Well	Groundwater Elevation (ft)
Moderate Drought	Zavala	Cargil	430
		Hargrove	440
	LaSalle	Echols	370
		Hinojosa	525
	Dimmit	Dixondale	480
Exceptional Drought	Zavala	Cargil	440
		Hargrove	450
	LaSalle	Echols	385
		Hinojosa	540
	Dimmit	Dixondale	500
Severe Drought	Zavala	Cargil	450
		Hargrove	460
	LaSalle	Echols	400
		Hinojosa	555
	Dimmit	Dixondale	520

The District is expanding its well monitoring program within Dimmit, La Salle and Zavala Counties. If you have a Carrizo Aquifer water well, preferably with access to electricity and Wi-Fi services, and if you are interested in allowing access by the District to the well location, please contact the District Office at 830-876-3801.
